# Manish Dabkara

Building EKI to be a \*Unicorn\* again | International Decarbonization & Environmental Commodity Markets Leader (Article 6, VCM, ETS, EPR, IREC, REC, Green Fuel) | CMD at EKIESL | TEDx speaker | Fortune 40U40 | GTD Trainer  
Indore, Madhya Pradesh, India

## Summary

Decarbonization becomes real when claims must survive audit, regulation, and reputational scrutiny—not just quarterly storytelling. My work sits in international decarbonization and environmental commodity markets (Article 6, VCM, ETS, EPR, and renewable attributes such as I-REC/REC), where credibility is built through governance and delivery.

I founded EKI (EnKing International) in 2008 and serve as Chairman & Managing Director of EKI Energy Services Ltd, a listed company in India. In January 2022, EKI reached unicorn status with a \$1 billion + valuation—the first carbon credit company in India to cross that milestone. Since then, EKI has served 3,500+ clients across 40+ countries and mobilized 200+ million offsets, scale that only matters when the underlying work is defensible.

Alongside the company, I hold ecosystem roles focused on market integrity and readiness, including President of the Carbon Markets Association of India and a Governing Council role with Carbon Registry-India. I was recognized by Fortune India as part of their 40 Under 40 list and have spoken publicly on the topic, including a TEDx talk ("A Path to a Greener Future").

Beyond climate markets, I build operating businesses in GTD training, green fuel manufacturing, and real estate—domains where discipline and repeatable execution decide outcomes.

## Experience

EKI RED - EnKing International Real Estate & Developers  
Managing Director  
January 2026 - Present (1 month)

Indore, Madhya Pradesh, India

Enking International Real Estate & Developers is redefining Indore's growth with a future-forward blend of sustainable design and refined luxury, delivering premium residential and commercial spaces that prioritize green planning, efficient resource use, and high-quality living.

Alongside its Indore-focused luxury developments, Enking International also undertakes strategic land aggregation and development to enable renewable energy projects with an India-wide focus, supporting the country's clean-energy buildout and long-term decarbonization goals. This approach aligns with India's national ambition to reach 500 GW of non-fossil power capacity by 2030 and the rapid scale-up of renewable energy capacity already underway.

**EKI Energy Services Ltd (EnKing International) @EKIEnergy**

**Chairman & MD**

August 2008 - Present (17 years 6 months)

Indore, Madhya Pradesh, India

#### Confederation of Indian Industry

Chair of Subgroup on Regulatory Carbon Credit under National Committee on Bioenergy

August 2024 - Present (1 year 6 months)

Delhi, India

Bioenergy sector also has the potential to play a significant role in meeting the world's growing energy needs while reducing greenhouse gas emissions and promoting sustainability. Various vital initiatives have been undertaken by our government over the last few years to encourage investment in the energy space. The Government has announced that green growth efforts help reduce the economy's carbon intensity and provide for large-scale green job opportunities. Hon'ble Prime Minister Shri Narendra Modi's announcement on the Global Biofuels Alliance (GBA) during G20 Leaders' Summit will accelerate sustainable biofuel deployment and support the global energy transition.

GBA will spawn international cooperation, especially among agriculturally endowed countries for furthering the goals of inclusive and green growth.

India's in net carbon zero goal of 2070 will also receive a fillip.. The alliance will also act as a central repository of knowledge and an expert hub. GBA aims to serve as a catalytic platform, fostering global collaboration for the advancement and widespread adoption of biofuels. The Global Biofuels Alliance has reinforced India's commitment to decarbonisation and just energy transition. Other major programs launched by the government to support the development of biofuels in India include the Sustainable Alternative Towards Affordable Transportation" (SATAT) scheme for boosting Compressed Biogas (CBG) production in India, Viable Gap Funding (VGF) for 2G bioethanol under Pradhan Mantri Ji-VAN Yojana, and grants for research and development in the bioenergy area.

CII National Committee on Bioenergy which represents a cross-section of industry leaders engaged in the manufacturing of machinery, production of enzymes, ethanol and biodiesel, use of biowaste, and other related businesses. The committee on Bioenergy is working towards achieving this government vision. As a result, we intend to make decarbonization a priority area in 2023.

Indian Institute of Technology, Kanpur  
Guest Faculty (Industry)  
March 2024 - Present (1 year 11 months)  
India

Services Export Promotion Council (SEPC) India  
4 years 5 months

Tvasta  
Investor Representative (on behalf of EKI Energy)  
April 2025 - Present (10 months)  
Indore, Madhya Pradesh, India

EKI Energy has invested in Tvasta, a pioneering deep-tech startup that's reimagining the future of construction through industrial 3D printing solutions.

With a strong focus on sustainability, customization, and productivity, Tvasta is leveraging advanced automation and digitization to transform the construction and manufacturing industries. Their in-house R&D has developed a complete ecosystem — from proprietary 3D printers and custom software to specialized raw materials — all engineered to create low-carbon, high-efficiency solutions.

Together, we're looking forward to revolutionizing the construction industry through low-carbon pathways and building a more sustainable future, one layer at a time.
